FIELD TRIP TO AGRO-BIODIVERSITY PARK

The Faculty of Botany, Department of Life Sciences organized a field trip to the Agro Biodiversity Park on August 26, 2023, for students from BZC and BTBC II year, as well as BZC III year. The trip aimed to provide first hand exposure to diverse agricultural biodiversity, offering a deeper understanding of sustainable agricultural systems and the conservation of plant genetic resources.

The trip allowed students to practically apply their theoretical knowledge gained in classrooms, fostering a greater appreciation for biodiversity's impact on agricultural sustainability. Their enthusiasm and active participation demonstrated a genuine interest in exploring concepts beyond traditional learning environments. Students gained the knowledge of different trees like *TECTONA GRANDIS*, SPECIES OF *FICUS* PLANTS as well as knowledge on SPECIES OF HONEY BEES.

Students are listening to the explanation given by scientist

One of the scientists explaining about APICULTURE.
