Little Flower Degree College

Little Flower Degree College, founded in 2008-09, is run by the congregation of Montfort Brothers of St. Gabriel, Province of Pune. This Congregation is the embodiment of the dream and vision of St. Montfort who was a seventeenth century educationist and social reformer. Little Flower Degree College believes in quality education and to make this possible we have an expert faculty, specialized in imparting effective training to future citizens. Further, we think beyond the syllabus and have incorporated numerous activities to sharpen the intellectual, physiological and aesthetic capabilities of the students. Though Little Flower Degree College is a minority institution, it strives to impart quality education without distinction of religion, caste or creed.

The Logo

The logo of the college consists of a wheel, a cross, a flower, a book, a lamp and an academic hood.

- The **wheel** stands for the universe. The perfection of the wheel inspires us to be systematic in our vision and efficacious in our approach.
- The **equal** armed Cross symbolizes the harmony of all our goals. It represents the relationship of man with God, himself, his fellowmen and nature.
- The **Flower** indicates a pure heart. It also stands for sincerity in ambition and self confidence.
- The **book** represents knowledge with which one can attain wisdom. It also signifies enlightenment through learning.
- The **Lamp** represents light. The symbol of light is eloquent. It represents goodness, freedom, hope, cognition and reason. Light reunites and harmonizes all aspects of life.
- The **academic hood** stands as a crescendo on the educational horizon. It also signifies the accolades and laurels education brings.

Vision “Lead to Illuminate”

We envision in our educational endeavour to facilitate young boys and girls to excel in their academic pursuit and to inspire them as they are the future of our society, having a binding responsibility to give back to the society more than what they benefited from it.

We aim to show the teenagers who come to us, the path of excellence in academic pursuits along with all round development of their personalities.

We affirm that our priorities along with academic excellence are also formation of youth in discipline, hardwork and moral values.

Mission

The statement of our mission is to mould our students as knowledgeable citizens with multi disciplinary global competencies. The college focuses to integrate in the enabling virtues of truth, fairness, tolerance and co-operation; to create and maintain an environment of excellence in education with technological advancement, effective pedagogy and methods of evaluation. It also provides life skills towards a successful career, home and society.

Principal's Message

With immense joy and pride, I present before you the second edition of the college magazine which stands as a testimony of unity between the staff and the students of this institution. It is a mirror that reflects the talent of the students.

I would like to dwell on the guiding theme of the year, “Be Right” which helps to discern what is right, choose right and persevere doing that which is right. Einstein's statement, “What is right is not always popular and what is popular is not always right”, is relatively far more relevant today than the great scientist's time. Our students have shown their leadership in saying a firm 'NO' to the negative influences and an emphatic 'YES' to all that is good in keeping with the theme of the year “Be Right”.

Of the six objectives of education namely basic qualities of the Head, Heart, Health, Humanity, Humility and Harmony, what needs more attention and thrust for higher education is the domain of the Head. In the modern world falsehood hides very cleverly among facts and vice-versa. So we need to train persons with high mental resolving power who can distinguish facts from falsehood. We, at LFDC, are committed to this transformation of students.

***The heights by men reached and kept
Were not attained by sudden flight
But they, while their companions slept
Were toiling upward in the night.***

Our effort goes in this direction of self motivation enabling students to keep their dreams alive with dedication and effort.

Each young man and woman is capable of presenting to the world with the possibility of a new beginning and the rekindling of hope. I am sure that all the students emit rays of light with hope, joy, love and innovation. Engage in the relentless pursuit of what is right, noble, and honorable.

I wish you all success and God's choicest blessings.

Editorial

Our college magazine is beaming with enthusiasm as it exhibits the magnificent artistic splendour of creative minds. The aspirations, perspectives and cherished moments bring to lime light the vision and mission of the college. The souvenir unleashes a stock of the creative endeavours during the academic year 2011-2012. Our sincere thanks to all our teachers, students and well wishers who contributed to bring out a wonderful edition.

Aims & Objectives

The aim of our college is to prepare our students for a meaningful life. As individuals and members of the society we try to develop the qualities of mind and heart of our students, besides their skills and aptitudes, which will enable them to become responsible contributing members of the society and the nation.

In order to achieve this along with academic excellence we focus our attention on the following aspects of life.

- Person oriented aspects
- Social and cultural aspects
- Professional and work oriented aspects
- Citizen and Nation related aspects
- Universal brotherhood and international understanding.

We strive to prepare the youth for life as ideal human beings.

Mrs. Jayanthi Reddy

Vice - Principal

Vice Principal's Message

"Education is a social process, education in growth, education is not a preparation for life but is life itself".

The purpose of education is not just to produce academicians but also to develop humane and able citizens. At Little Flower Degree College, we ensure that a congenial environment for learning is maintained while making sure that students have ample opportunities to develop their personal and inter - personal skills.

Our well qualified members of the staff, who share a passion for teaching, bring out the best in both themselves and the students. We edify our students in classical as well as contemporary models of learning while giving them a solid foundation in cultural in sights of the world. We take pride in inculcating ethical values and creating a culture of learning where students are free to explore their interests in a variety of fields while developing their character as well.

At LFDC, we also encourage students to embark on difficult challenges that stretch their potential with an with an unyielding faith in the capacities of our teachers and students. The management and staff are deeply committed to work tirelessly in order to make our students' learning experience an elucidating and exciting one.

I hope that if everyone shows this common passion to create an enthusiastic learning path, our students will definitely achieve laurels they have never before, and a stronger, more committed generation will emerge after going through the canals of learning with us.

May God Bless You..

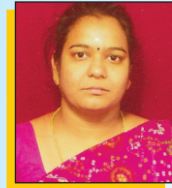

MESSAGES FROM MENTORS

Mr. S.V. Vijay Reddy
HOD, Dept. of Computer Science

Computer science is a fascinating subject and one that is now indispensable in our lives. Almost every aspect of modern life involves computing – from mobile phones, televisions, games, security, accounts and aeronautics etc. Every Organization payroll, customer records, finance are held electronically containing millions and millions of records. The digital world relies upon us. Looking to the future initiatives such as cloud computing which connects us all through small portable devices, enhancing social networks and allowing us to exchange audio and video data in our daily lives

Mrs. Sandhya Arya
HOD, Dept. of Commerce

In today's world, one can survive a day keeping the doctor away. But hardly one can survive a day without one's involvement in commerce. money, stock market, economy etc is all about commerce. One cannot imagine the world without the involvement of commerce a single day. Everyone on earth is a user of commerce".

"We are proud to be Commerce".

Mrs. O. Sharada
(Dept. of Commerce)

Commerce is as old as the civilization of human society, as it is linked in every sphere of human life. All the nations of the World are interdependent because of foreign trade & commerce.

Commerce is the beginning and the end of the Business World.

Mr. D. Pradeep Kumar
Department of Sanskrit

Sanskrit is the most ancient and perfect among the great languages of the world. Its store house of knowledge is an unsurpassed and the most invaluable treasure of the world. This language is a true symbol of the great Indian tradition and thought, which has exhibited full freedom in the search of truth and guided towards universal truth. This unique language contains not only good account of wisdom for the people of this country, but it is also an unparalleled way to acquire proper knowledge and is thus significant for the people of the entire world.

The culture of Sanskrit and Sanskrit literature is actually the culture of synthesis and assimilation. The message of Sanskrit literature is one of humanism, unity of mankind, values, peace and mutual understanding for the harmonious development of the individual and the society. It would help reviving the ethos of India, because synthesis, harmony and reconciliation comprise the essence of the culture of Sanskrit. For eg.

सर्वे भवतु सुखिः सर्वे सतु । रामयाः ।

सर्वे भद्राणि । श्यतु मा कः दुः खभाग्भवेत् ॥

ॐ शान्तिः शान्तिः शान्तिः ।

Meaning :
May all become happy,
May all become free from illness,
May all see what is auspicious
Let no one suffer,
Om peace, peace, peace.

Our first Prime Minister Pt. Jawaharlal Lal Nehru, who had a positive approach towards this language, has said : **"The past has gone and the present is with us and we work for the future. But I have no doubt that whatever shape that future may take one of the biggest, the strongest, the most powerful and the most valued of our legacies will be the Sanskrit language.**

Mrs. Usha Rani
Dept. of Micro Biology

**Importance of
Good Bacteria.**

The adult intestine contains around 2-4 ponds of bacteria. This bacterial load is 10 times greater than the number of cells within our body. In real numbers, as we have about 75 trillion cells, we have approximately 750 trillion bacterial cells with in our body. It is astonishing to think about our bodies in such a manner, but we are literally living, breathing bacterial reservoirs.

Although we have been trained by society to dislike and often to fear bacteria and other microorganisms, most of those that populate our systems work in harmony with us in what is called a symbiotic or mutually benefiting, relationship. There are those, however, that are pathogenic in nature and when they are allowed to accumulate in large numbers, bring about distress and disease. The ideal ratio of progenic (life-supporting) Vs. Pathogenic (disease forming) species is 85:15, when pathogenic species grows beyond this ratio, problem begins to occur.

MESSAGES FROM MENTORS

Ms. Y. Deborah, HOD, Dept. of English.

"Thought is the bud; language is the blossom; action the fruit behind it."

No one denies the importance of English language in the present time as global language. It is clear that the English language has become more dominant around the world. In some countries it is used as the mother tongue and ,other countries learn it as second language in their schools. This makes English widespread. In addition, many reasons which contributed to rising of English are spreading; for example, use it for communication between people around the world, as well as, it is language of modern times. On other hand , English is the language of science and technology.

There is no doubt that, English is the language of communication between the people with different cultures. It is also the language of computers that help to communicate with the people around the world through Internet technology and e-mail. People who know English can deal with the Internet, which is regarding information and communications revolution.

Also one of reasons that contributed to the spread of English is that, it is the language of the modern era, where the people use it in various fields of life such as, economy, e-commerce, medicine and aviation. In addition, it is the language which is used in travel and tourism. These reasons motivate people to learn English One of the main reasons why English is dominant in the present time, is its use in the field of education by universities and institutions and in scientific research. It has become an addendum to the mastery of scientific individual stock. On the other hand, English is an important requirement in most government and private jobs.

It is quite clear that English has become a necessity today. We need it in different fields of life. The English language has become easier to learn more than ever before with the availability of many sources to help people learn very easily, such as the educational institutions, books and internet, which are spread around the world.

"The English language is nobody's special property. It is the property of the imagination. It is the property of the language itself."

CAN YOU CHANGE THE WORLD?

When I was young and free and my imagination had no limits, I dreamed of changing the world. As I grew older and wiser I realized the world would not change and I decided to shorten my sights somewhat and change only my country. But it too seemed immovable.

As I entered my twilight years, in one last desperate attempt, I sought to change only my family, those closest to me, but they would have none of it.

And now here I lie on my death bed and realize [perhaps for the first time] that if only I'd changed myself first, then by example I may have bettered my country, and who knows I may have changed the world.

Educational Tour

In January (from 11-1-2012 to 15-1-2012), a group of 50 students under the supervision of Vice Principal and Lecturers went on an Educational cum excursion trip to Pune. They visited Lonawala, Kandala, Kerala caves, Ekvira temple, Was Musiem, Ryewood park, Lonawala Lake, Strawberry Garden and Chocolate Factory. In addition they also visited historical places like Lord Shiva Temple, Pratap Gadh Fort at Mahabaleshwar.

Our students also visited Nalla Malla Forest as a part of the certificate course

Farewell

A heart felt farewell was organized to bid adieu to the out going students wishing them success in all their future attempts.

Keep Believing in Yourself!

There may be days when you get up in the morning and things aren't the way you had hoped they would be.

That's when you have to tell yourself that things will get better.

There are times when people disappoint you and let you down.

But those are the times when you must remind yourself to trust your own judgments and opinions, to keep your life focused on believing in yourself.

There will be challenges to face and changes to make in your life, and it is up to you to accept them.

Constantly keep yourself headed in the right direction for you.

It may not be easy at times, but in those times of struggle you will find a stronger sense of who you are.

So when the days come that are filled with frustration and unexpected responsibilities, remember to believe in yourself and all you want your life to be.

Because the challenges and changes will only help you to find the goals that you know are meant to come

ONE PARAGRAPH THAT EXPLAINS LIFE

Arthur Ashe, the legendary Wimbledon, player was dying of AIDS which he got due to transfusion of infected blood, during a heart surgery in 1983. From world over, he received letters from his fans, one of which conveyed :

"Why does God have to select you for such a bad disease?"

To this Arthur Ashe replied :

"The world over - 50 million children start playing tennis, 5 million learn to play tennis, 5000000 learn professional tennis, 50,000 come to the circuit, 5000 reach the grand slam, 50 reach Wimbledon. 4 to semi final, 2 to the finals. When I was holding a cup I never asked God 'Why me'? And today in pain I should not be asking God why me?"

"**Happiness** keeps you sweet, **Trial** keeps you strong, **Sorrow** keeps you human, **Failure** keeps you humble and **Success** keep you glowing but only **Faith** and **Attitude** keep you going....
Never ask God 'Why me'?
Always ask 'Try me'.

To LFDC, My Teacher

My college, My teacher - where do I begin?

Where do I find words for the feeling within?

Impart the things I have through passage of time?

To my friends who helped me, my teachers who cared

To the divine, power that held me when I was scared,

To the light that guided me, was it you?

Was it I or the Holy Ghost who helped me when I cried?

To my teachers who listened for the lessons they have taught, To those who know they are being referred to and those who do not.

For my friends, my strong hold, My courage and all I am, wands could never unfold to you, The emotions of time can To each one of you who helped me, Take precious steps in life.

We have separate ways, Where we each must go, And there is a plan so great, That we do not know, We will grow up for it is the way of time, but we are bound for ever by the strength of our minds.
